Projects

[Cash Flow Minimizer System](#) | C++

- This System minimizes the number of transactions among multiple banks in the different corners of the world that uses different modes of payment. There is one world bank (with all payment modes) to act as an intermediary between banks that have no common mode of payment.

[Image search Engine](#) | HTML,CSS,JAVASCRIPT

- User can input a text as query. The API will process the text and will return related images from unsplash.com

[Portfolio](#) | HTML,CSS

- This project showcases my work samples, individual skills, achievements, and expertise. It shows my capabilities ,qualifications, accomplishments and hobbies.

Achievements

- Executed over **500+** [LeetCode challenges](#) and **600+** [GeeksForGeeks problems](#) to sharpen algorithmic skills consistently.
- Attained 5-star rating in **Problem Solving, C++** on [HackerRank](#), showcasing strong skills and accomplishments in these areas of programming.
- Achieved a maximum **rank of 1656** on [CodeChef](#)
- International and Regional Maths Olympiads Qualified
